QUALITY IN THE DETAILS

Experience and innovation at the customer's disposal

DETAILED ANALYSIS OF THE COSTUMER'S NEEDS

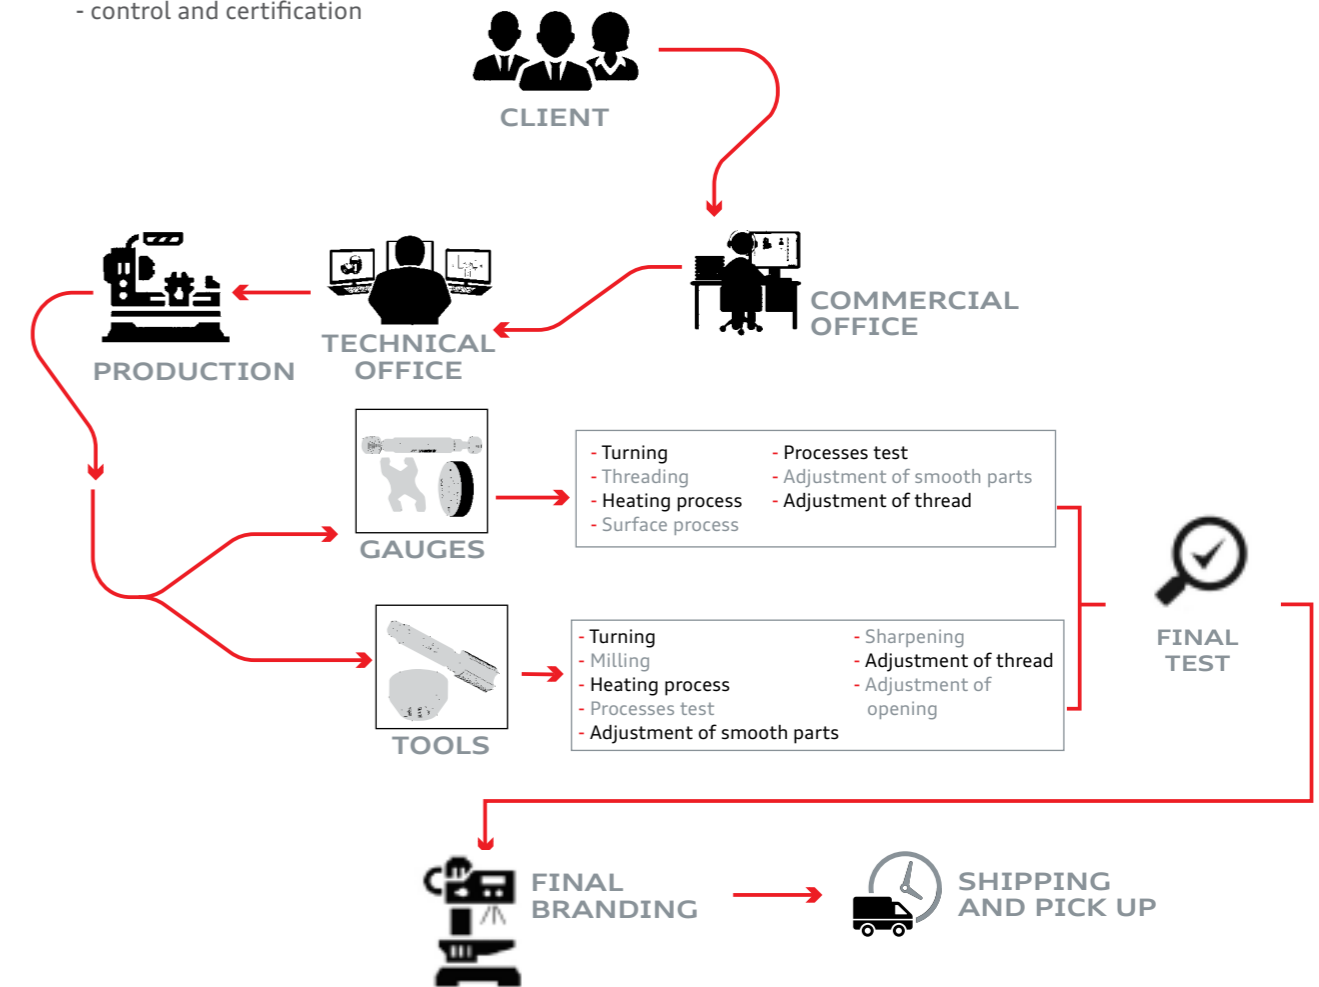

Measurement system solutions

Tamburini designs and produces measurement system solutions. We start from the customer's needs and follow every step of production that will ultimately end up in the final product. The company also offers product-control solutions, putting together the mechanic with the survey and the processing of data following specific customer's requests.

The production follows these phases:

- analysis of customers' needs
- product design
- creation of the product
- control and certification

PRODUCTS REALIZED ON THE COSTUMERS' NEEDS

Tools and gauges of every typology

The range of tools includes:

- ◆ TAPS
- ◆ DIES
- ◆ MILLING MACHINE
- ◆ SPECIAL TOOLS

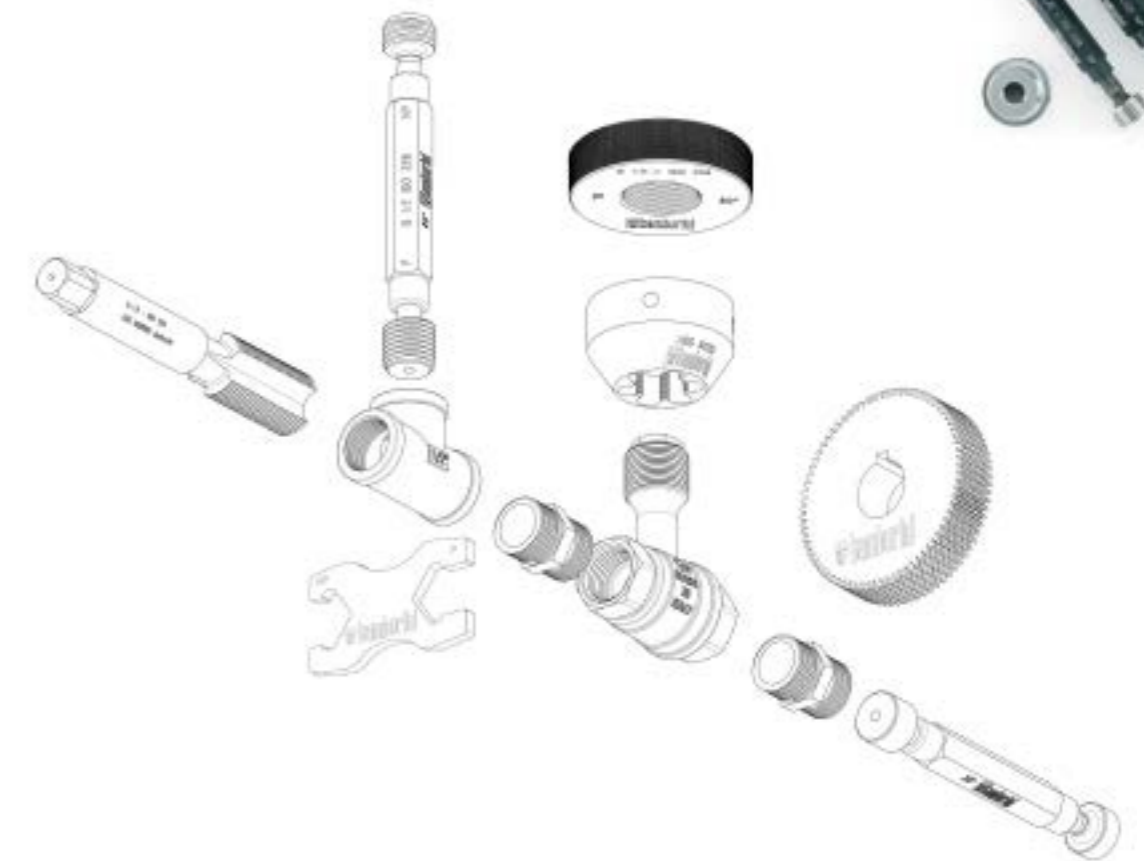

The range of gauges includes:

- ◆ PLAIN AND THREADED BUFFERS
- ◆ PLAIN AND THREADED RINGS
- ◆ COMPLEX DIMENSIONAL - CHECKING TOOLS

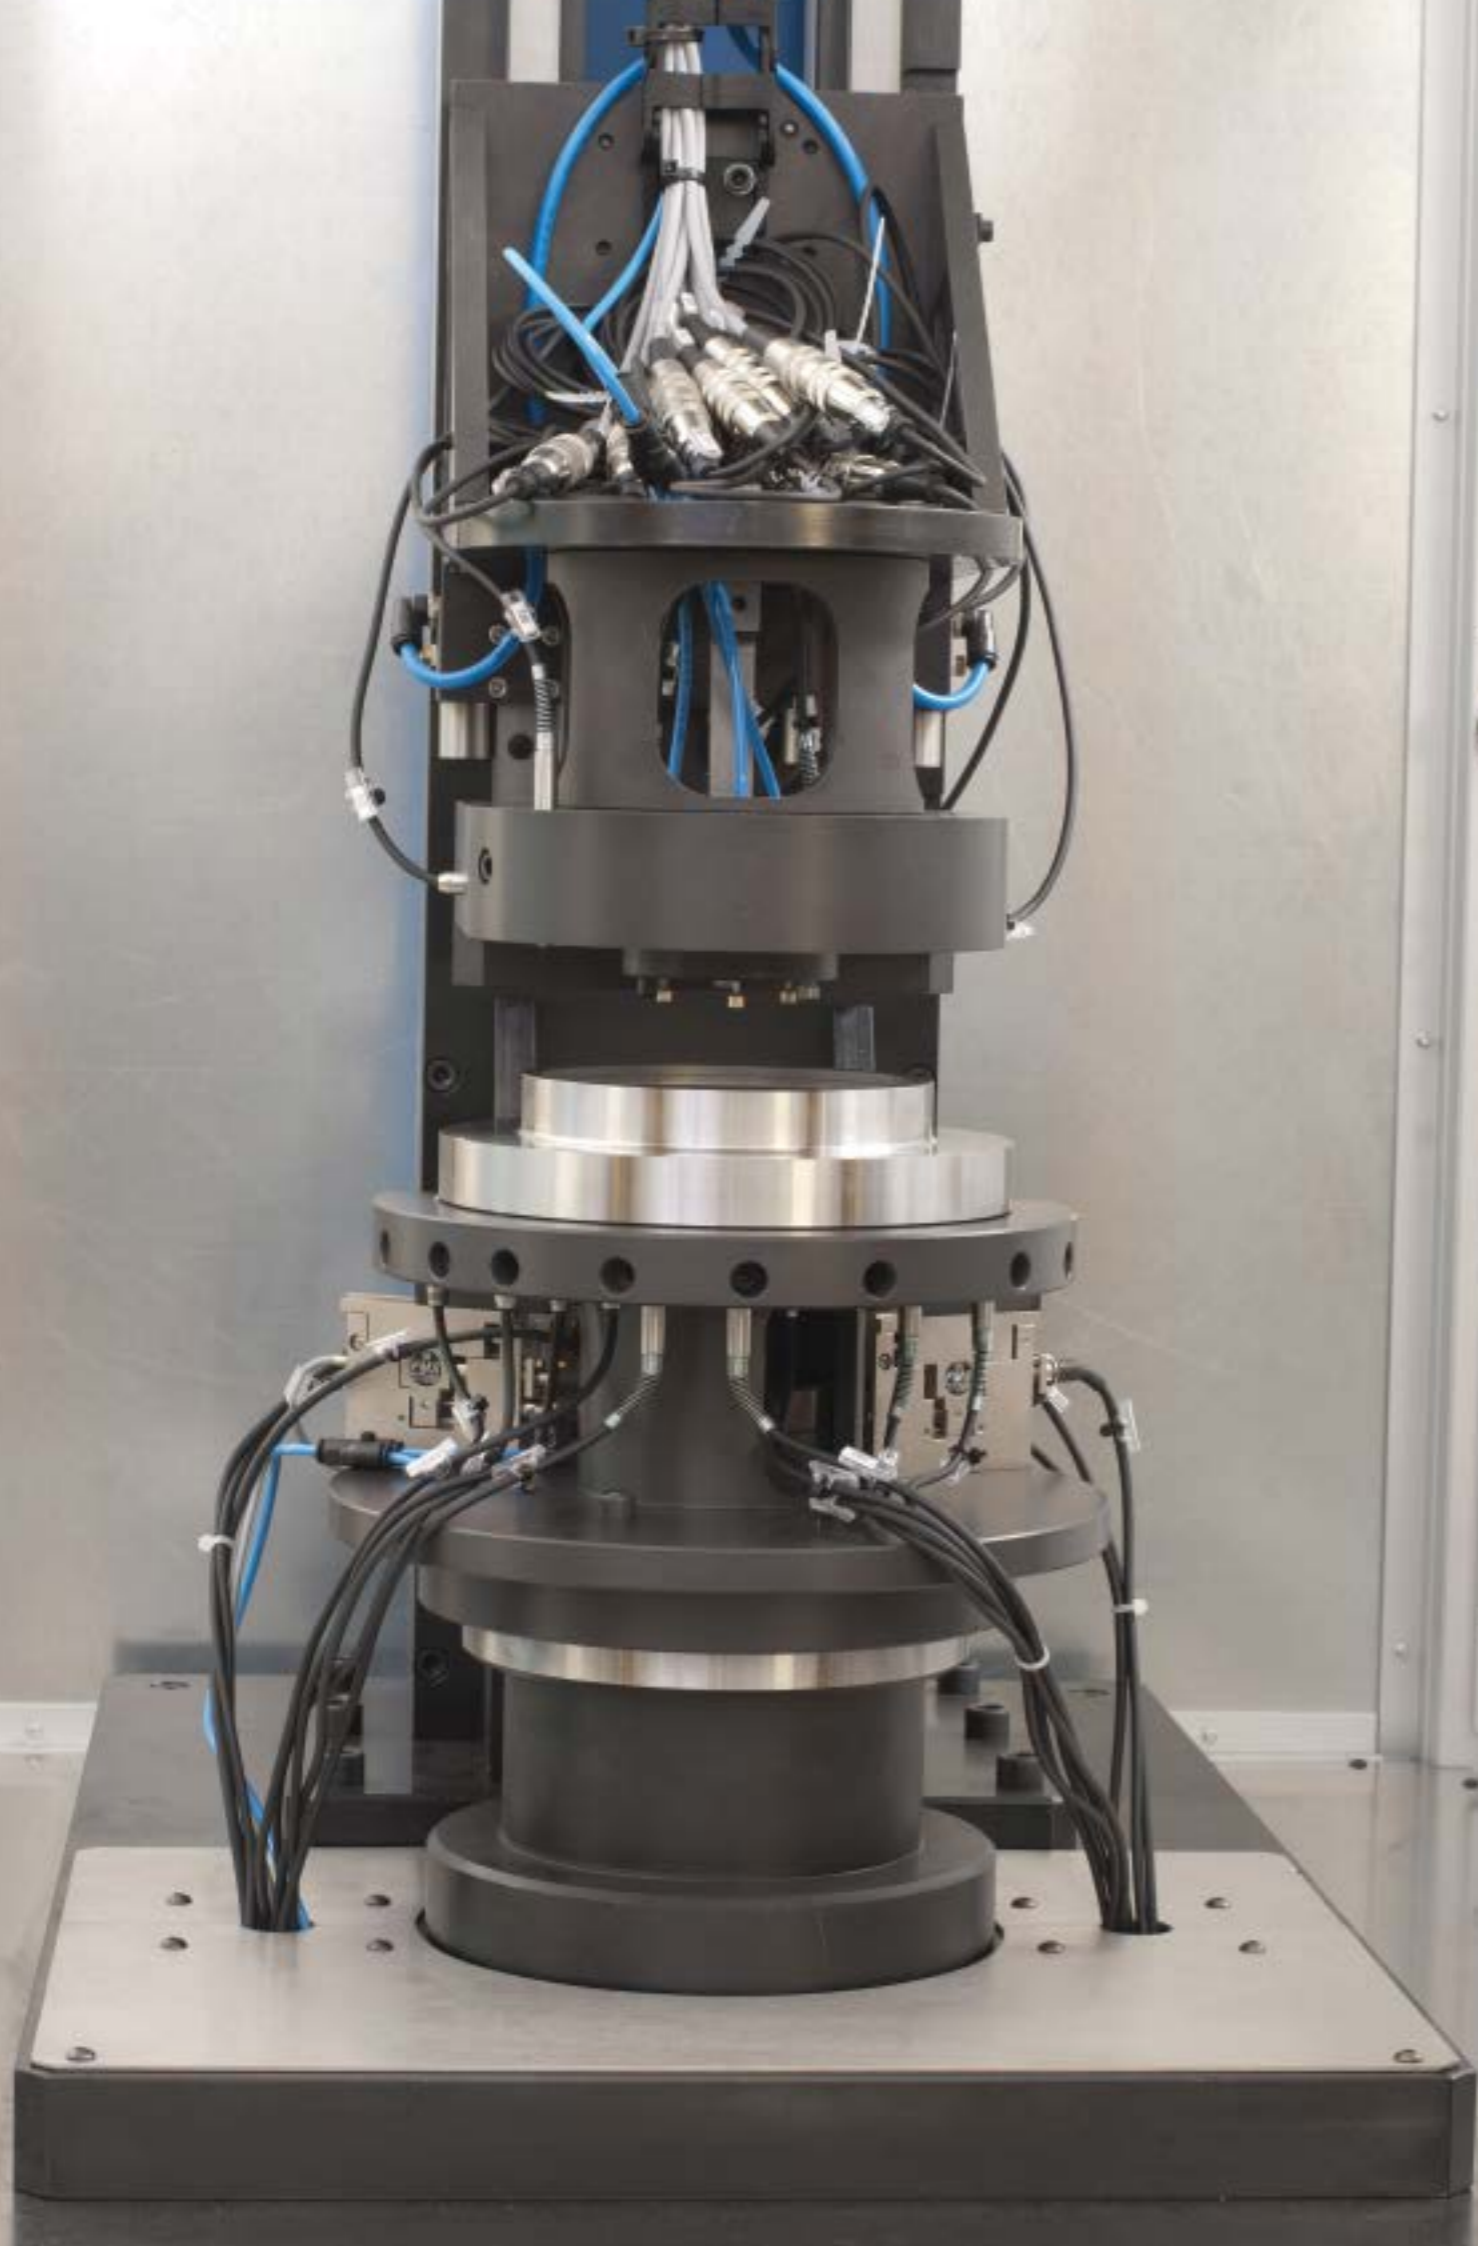

In the last few years we have also specialized in the production of:

- ◆ CUSTOMIZED PRODUCTION
- ◆ CONTRACT WORK

The TAMBURINI brand equals high quality services and products.

GAUGES - THREADED RINGS

LABORATORY TESTS ACCURATE AND CERTIFIED

Issue of certificates and calibration reports

The metrology Lab provides control for the entire production. Thanks to these controls, we are able to check the fundamental characteristics of the product and to evaluate the degree of the finishing. The lab issues calibration reports and declarations of conformity as required by the Quality Certifications.

Tamburini's primary metrology Lab is accredited ACCREDIA and operates in accordance to the European legislation CEI EN ISO/IEC 17025 carrying out test and calibration services for primary tools.

We edit certificates approved by all the Nations who signed the multilateral agreement of the "European Cooperation for accreditation" (EA).

LAT N° 079

PERFORMING ORGANIZATION OF PRODUCTION PROCESSES

On an area of more than 7.000 square metres

The goal of our company is the constant improvement of the organization and efficiency of the processes, in order to maintain our leader position in the measurement and control field in which (other than the production of standard and special gauges) flexibility and success strategy are also required.

We pursue this goal by constantly improving our machinery and control equipment, and by employing modern management and marketing systems.

PRODUCTION AREA

STAFF APPRECIATION

For a constant growth

Welfare is one of Tamburini's main priorities. We've always invested on our employees and partners in order to be able to build a lasting relationship with them.

The professional growth of the staff, along with the acquirement of new and specific competences, is constant at Tamburini and it is perceived as necessary to refine and improve the performance of the productive processes.

Tamburini has always distinguished itself for the great attention given to all new professional figures who come from the best technical institutes of Brescia. This represents one of the winning points of the company. It is also what allows Tamburini to have a staff in constant growth and to maintain a marker leader position in its field.

GROUP PICTURE

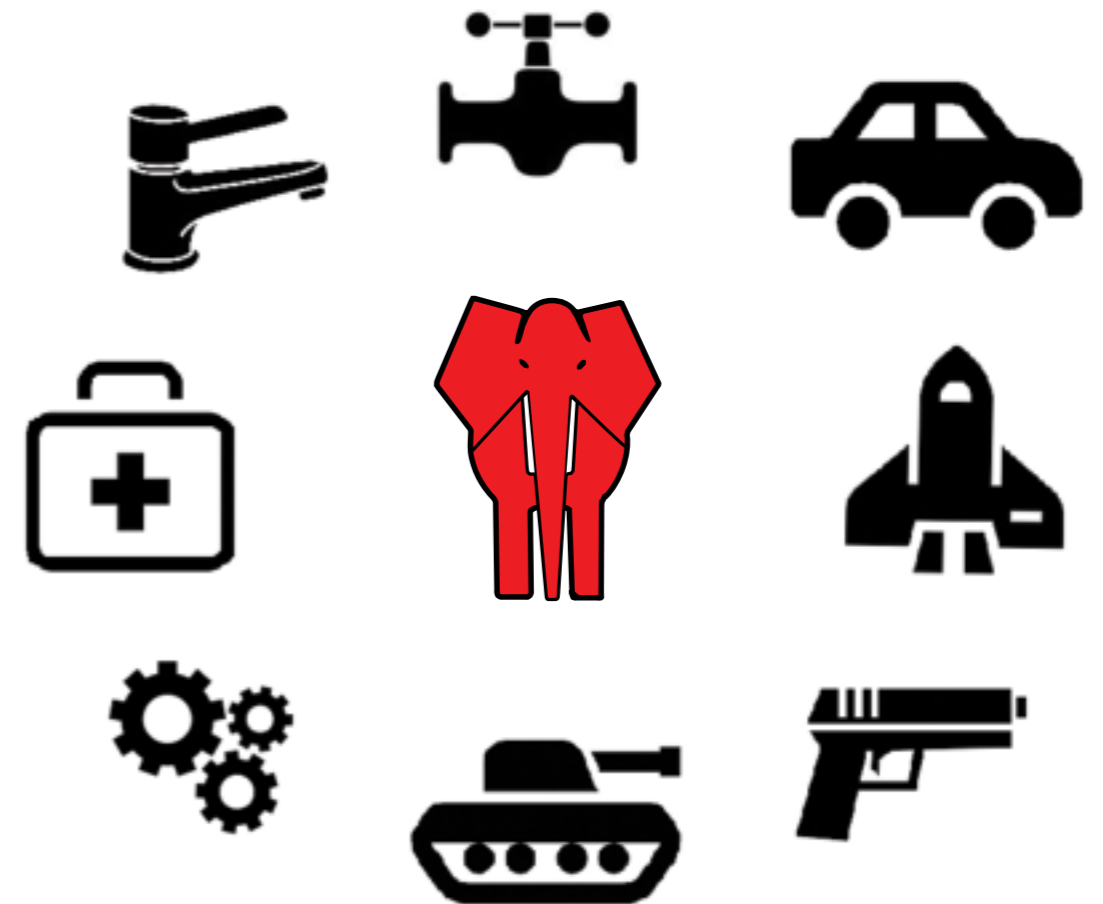

QUALITY PRODUCTS AND SERVICES FOR DIFFERENT SEVERAL SECTORS

Where high precision is required

The business imperative is to invest in quality and technology to offer services and products to the most demanding and specialized companies of several sectors.

In the last few years Tamburini is pointing to new exciting sectors like the aerospace and medical ones, the arms industry, automotive industry and elettromedical industry. Moreover, Tamburini has increased contract work with a specially-made production department equipped with new, technologically advances machinery and specialized personnel.

SUPPORT FOR SPORT AND CULTURE

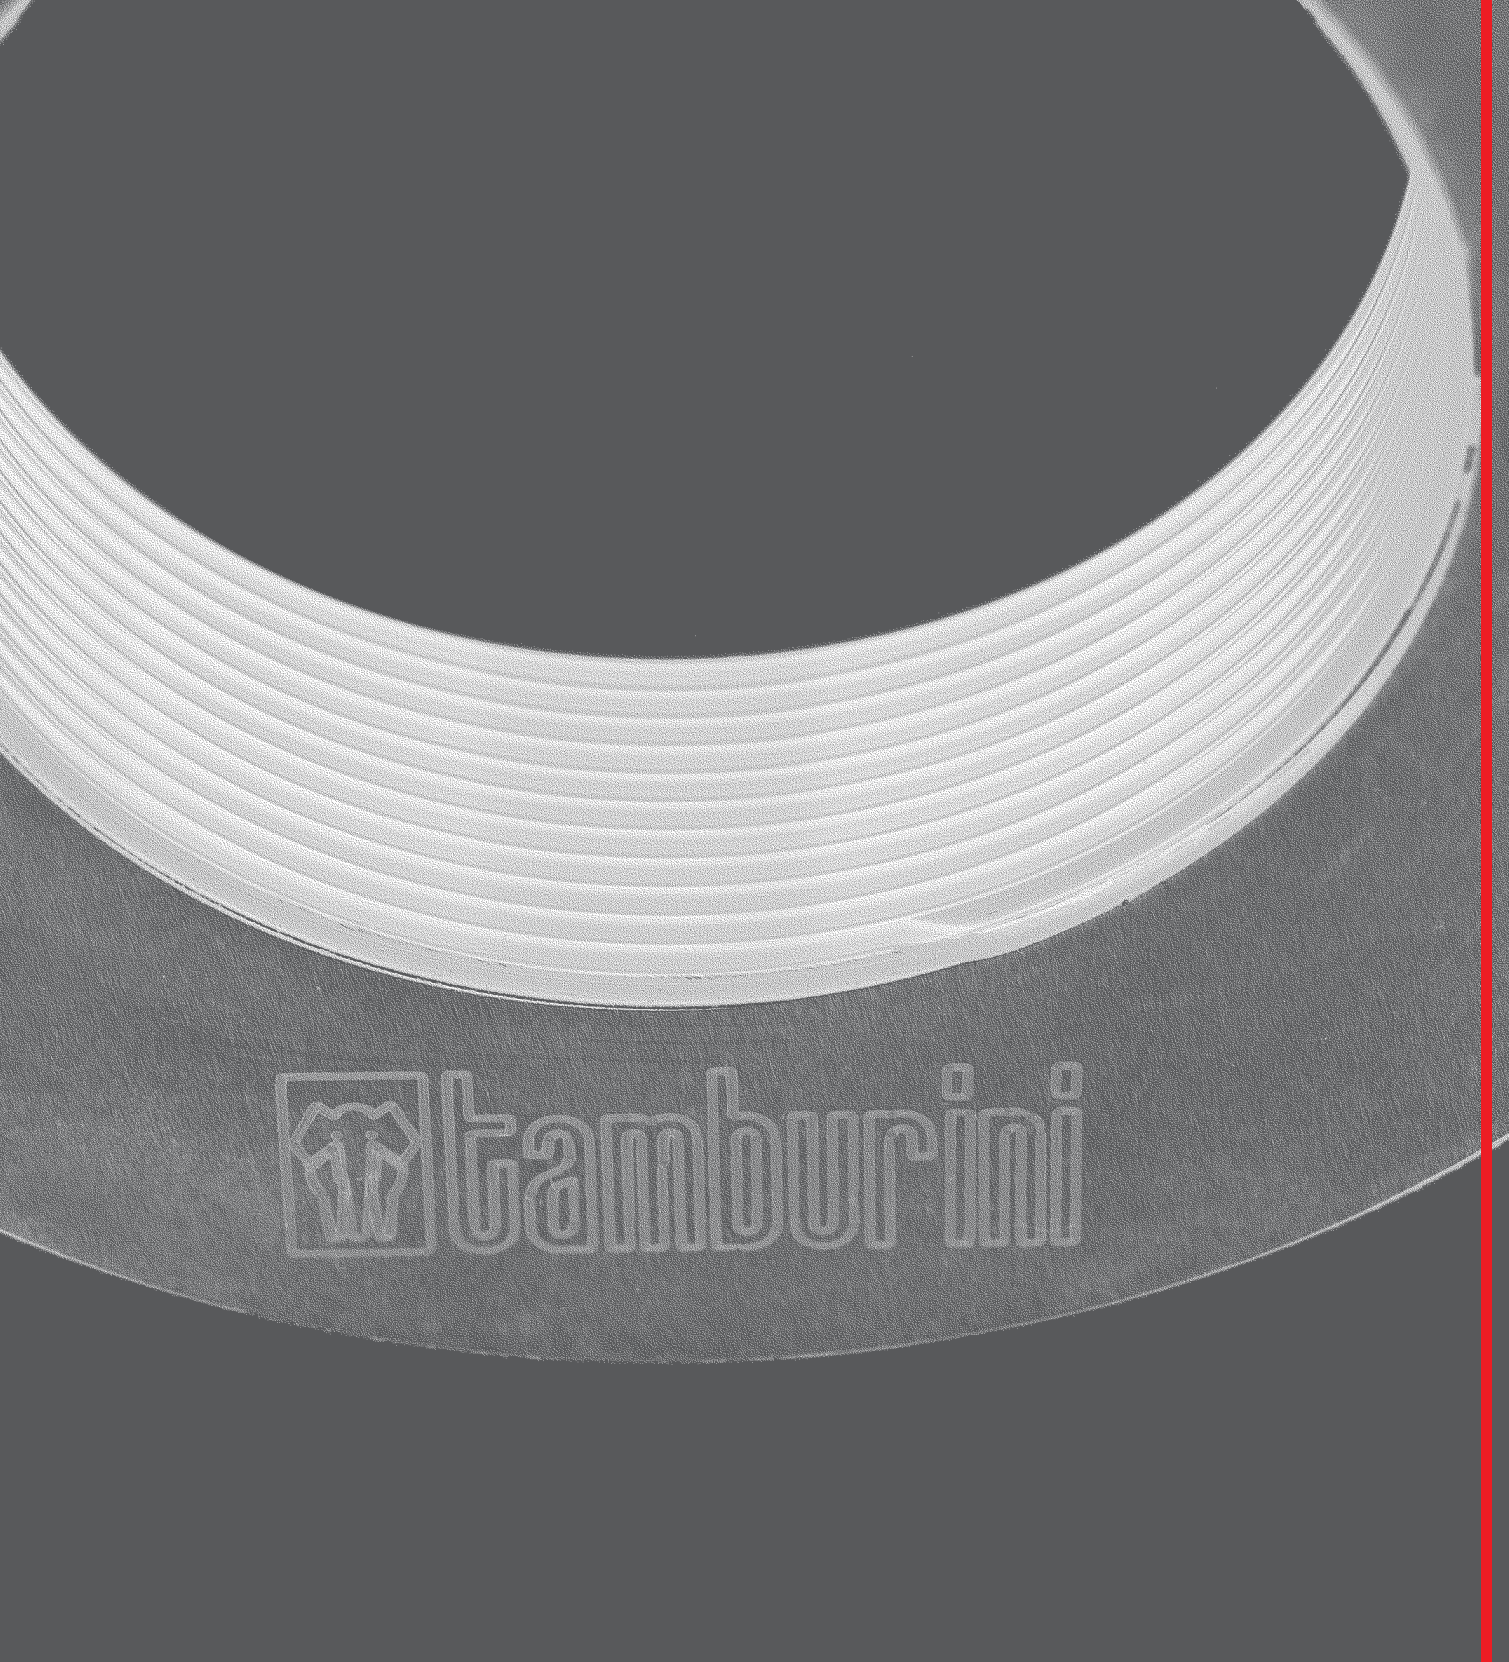

Participation in our territory's initiatives

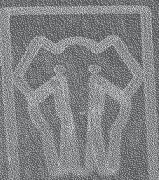

Tamburini supports local sport groups, in particular it has been sponsor of the cycling team that takes its directly from the company and Mariani Boxe since 2015.

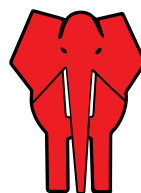

In 2017 Tamburini joined the Art Bonus, thanks to the financing allocated for the restoration of the "Vittoria Alata" statue, symbol of the City of Brescia.

The restoration process, realized by the "Opificio delle Pietre Dure" is going to take 2 years, and it's going to end with the placement of the statue where it belongs: the Capitulum Temple of Brescia. Tamburini has decided to support this very important project, as it is in the City of Brescia that the company has its roots.
